Index to Volume 5: Subject

Allograft, heart; *see* Heart transplantation
Alpha-adrenoceptors; *see* Receptors, adrenergic, alpha
Ambulatory care
  Ambulatory blood pressure and cardiovascular risk stratification (Mansoor and White) 61 (Preventive medicine)
  Identification and treatment of myocardial ischemia in patients undergoing peripheral vascular surgery (Andrews et al) 8
Aneurysm
  Infected pseudoaneurysm at the site of an iliac artery Palmaz stent: case report and review (Mossad et al) 277 (Vascular grand rounds)
Angioplasty
  Functional outcomes for patients with intermittent claudication: bypass surgery versus angioplasty versus noninvasive management (Reifler et al) 203
Angiotensin-converting enzyme inhibitors
  The Ca^{2+} antagonist verapamil potentiates the effect of the angiotensin-converting enzyme inhibitor trandolapril on cyclic coronary blood flow reductions (Kirchengast et al) 144
  Efficacy and safety of perindopril and hydrochlorothiazide in stage I–III hypertension (Black et al) 191
Angiotensin I
  Conversion of angiotensin I to angiotensin-(1–7) by thimet oligopeptidase (EC 3.4.24.15) in vascular smooth muscle cells (Chappell et al) 129
Angiotensin II
  Effect of antihypertensive drugs on vascular hypertrophy and vascular angiotensin II in two-kidney, one-clip hypertensive rats (Morishita et al) 38
Antihypertensive agents
  Effect of antihypertensive drugs on vascular hypertrophy and vascular angiotensin II in two-kidney, one-clip hypertensive rats (Morishita et al) 38
  Efficacy and safety of perindopril and hydrochlorothiazide in stage I–III hypertension (Black et al) 191
  Preservation and restitution of vascular integrity by antihypertensive therapy: do calcium antagonists do more than lower blood pressure? (Dahlöf) 120
Antioxidants
  Mechanisms of low-density lipoprotein oxidation: implications for antioxidant therapy (Goldstein and Heinecke) 212 (Trends)
Aorta
  Current controversies in aortoiliac occlusive disease (Byrne et al) 223 (Trends)
Arm
  Hypertensive encephalopathy in a young man with undetectable upper extremity blood pressure (Hoffman) 69 (Vascular grand rounds)
Arterial occlusive diseases
  Current controversies in aortoiliac occlusive disease (Byrne et al) 223 (Trends)
Aspirin
  The antithrombotic effects of acetylation of fibrinogen by aspirin (Ezratty et al) 152
Atherosclerosis
  Cardiac allograft vascular disease: pathophysiologic mechanisms leading to atherosclerosis (Valantine) 233 (Trends)
  Pathophysiology of plaque rupture (Shah et al) 244 (Trends)
  Triglyceride-rich lipoproteins: origins, fates, and possible roles in atherogenesis (Jones) 54 (Trends)
  Vascular smooth muscle and atherosclerosis: role of isoprenoids and calcium antagonists (Corsini et al) 111
Blood pressure
  Ambulatory blood pressure and cardiovascular risk stratification (Mansoor and White) 61 (Preventive medicine)
  Determinants of long-term blood pressure response to renal revascularization (White et al) 16
  Effect of increased intraluminal pressure on human saphenous vein vasomotor function in vitro (Schwartz et al) 31
  The endothelium: influence of blood pressure and lipids (Noll and Lüscher) 95
  Hypertensive encephalopathy in a young man with undetectable upper extremity blood pressure (Hoffman) 69 (Vascular grand rounds)
  Preservation and restitution of vascular integrity by antihypertensive therapy: do calcium antagonists do more than lower blood pressure? (Dahlöf) 120
Brain diseases
  Hypertensive encephalopathy in a young man with undetectable upper extremity blood pressure (Hoffman) 69 (Vascular grand rounds)
Calcium
  Antiproliferative effects of verapamil enantiomers on vascular smooth muscle cells (Simpson et al) 46
  The Ca^{2+} antagonist verapamil potentiates the effect of the angiotensin-converting enzyme inhibitor trandolapril on cyclic coronary blood flow reductions (Kirchengast et al) 144
  Preservation and restitution of vascular integrity by antihypertensive therapy: do calcium antagonists do more than lower blood pressure? (Dahlöf) 120
  Vascular smooth muscle and atherosclerosis: role of isoprenoids and calcium antagonists (Corsini et al) 111
Cardiac transplantation; *see* Heart transplantation
Cardiovascular risk factors; *see* Risk factors
Carotid artery, internal
  Dissection of the extracranial internal carotid artery (Mansoor and White) 270 (Vascular grand rounds)
Cavernous hemangioma; *see* Hemangioma, cavernous

Carotid artery, internal
  Dissection of the extracranial internal carotid artery (Mansoor and White) 270 (Vascular grand rounds)
Cavernous hemangioma; *see* Hemangioma, cavernous

Cerebrovascular disorders
Dissection of the extracranial internal carotid artery (Mansoor and White) 270 (Vascular grand rounds)
Contraceptives, oral
Heparin in the treatment of intracranial sinus venous thrombosis (Bossi et al) 199
Coronary circulation
The Ca^{2+} antagonist verapamil potentiates the effect of the angiotensin-converting enzyme inhibitor trandolapril on cyclic coronary blood flow reductions (Kirchengast et al) 144
Coronary disease
Assessing cardiac risk of vascular surgery: the Massachusetts General Hospital experience (Abraham et al) 160 (Trends)
Pathophysiology of plaque rupture (Shah et al) 244 (Trends)
Correction
Correction (Olin and Bacharach) 292 (Letter)
Diet
Nutrient intake and cardiovascular risk factors of first-year medical students (Farris et al) 138
Dissection
Dissection of the extracranial internal carotid artery (Mansoor and White) 270 (Vascular grand rounds)
Education
European fellowship in medical angiology: program proposal (Catalano and European) 5 (Editorial)
Guidelines for a training program in vascular medicine: a position paper from the Society for Vascular Medicine and Biology (Cooke et al) 1 (Editorial)
Report to the National Heart, Lung and Blood Institute from the Stanford Center for Vascular Medicine and Biology (Cooke) 183 (Vascular center update)
Report to the National Heart, Lung and Blood Institute from The University of Washington (Culver) 187 (Vascular center update)
Vascular Center at Northwestern University Medical School (Pearce et al) 286 (Vascular center update)
Effort; *see* Exertion
Electrocardiography, ambulatory
Identification and treatment of myocardial ischemia in patients undergoing peripheral vascular surgery (Andrews et al) 8
Encephalopathy; *see* Brain diseases
Endothelium, vascular
The endothelium: influence of blood pressure and lipids (Noll and Lüscher) 95
Hypertension: hypertrophy, remodelling, and dysfunctional endothelium (Heagerty) 107
Endothelium-derived nitric oxide; *see* Nitric oxide
Exertion
Effort thrombosis (Ma and Cooke) 87 (Images)
Fellowships and scholarships
European fellowship in medical angiology: program proposal (Catalano and European) 5 (Editorial)
Guidelines for a training program in vascular medicine: a position paper from the Society for Vascular Medicine and Biology (Cooke et al) 1 (Editorial)
Fibrinogen
The antithrombotic effects of acetylation of fibrinogen by aspirin (Ezratty et al) 152
Graft occlusion, vascular
Cardiac allograft vascular disease: pathophysiologic mechanisms leading to atherosclerosis (Valantine) 233 (Trends)
Guidelines
Guidelines for a training program in vascular medicine: a position paper from the Society for Vascular Medicine and Biology (Cooke et al) 1 (Editorial)
Heart transplantation
Cardiac allograft vascular disease: pathophysiologic mechanisms leading to atherosclerosis (Valantine) 233 (Trends)
Hemangioma, cavernous
Adult hepatic cavernous hemangioma (Ma and Cooke) 74 (Vascular grand rounds)
Heparin
Heparin in the treatment of intracranial sinus venous thrombosis (Bossi et al) 199
Holter monitoring; *see* Electrocardiography, ambulatory
Hydrochlorothiazide
Efficacy and safety of perindopril and hydrochlorothiazide in stage I–III hypertension (Black et al) 191
Hypertension
Efficacy and safety of perindopril and hydrochlorothiazide in stage I–III hypertension (Black et al) 191
The endothelium: influence of blood pressure and lipids (Noll and Lüscher) 95
Hypertension: hypertrophy, remodelling, and dysfunctional endothelium (Heagerty) 107
Hypertension and vascular integrity: concept and perspectives—foreword (Furberg and Hansson) 93
Hypertensive encephalopathy in a young man with undetectable upper extremity blood pressure (Hoffman) 69 (Vascular grand rounds)
Lipid-lowering drugs: potential for primary and secondary prevention (Sleight) 125
Preservation and restitution of vascular integrity by antihypertensive therapy: do calcium antagonists do more than lower blood pressure? (Dahlöf) 120
Vascular smooth muscle and atherosclerosis: role of isoprenoids and calcium antagonists (Corsini et al) 111
Hypertension, renal
Effect of antihypertensive drugs on vascular hypertrophy and vascular angiotensin II in two-kidney, one-clip hypertensive rats (Morishita et al) 38
Hypertension, renovascular
Determinants of long-term blood pressure response to renal revascularization (White et al) 16

Severe supine hypertension from renovascular disease in a patient with idiopathic orthostatic hypotension (Tsapatsaris) 174 (Vascular grand rounds)
Hypertriglyceridemia
Triglyceride-rich lipoproteins: origins, fates, and possible roles in atherogenesis (Jones) 54 (Trends)
Hypertrophy
Effect of antihypertensive drugs on vascular hypertrophy and vascular angiotensin II in two-kidney, one-clip hypertensive rats (Morishita et al) 38
Hypertension: hypertrophy, remodelling, and dysfunctional endothelium (Heagerty) 107
Hypotension, orthostatic
Severe supine hypertension from renovascular disease in a patient with idiopathic orthostatic hypotension (Tsapatsaris) 174 (Vascular grand rounds)
Iliac artery
Current controversies in aortoiliac occlusive disease (Byrne et al) 223 (Trends)
Infected pseudoaneurysm at the site of an iliac artery Palmaz stent: case report and review (Mossad et al) 277 (Vascular grand rounds)
Infection
Infected pseudoaneurysm at the site of an iliac artery Palmaz stent: case report and review (Mossad et al) 277 (Vascular grand rounds)
Intermittent claudication
Functional outcomes for patients with intermittent claudication: bypass surgery versus angioplasty versus noninvasive management (Reifler et al) 203
Popliteal entrapment syndrome: case report, review, and sonographic diagnosis (Raby et al) 282 (Vascular grand rounds)
Internal carotid artery; *see* Carotid artery, internal
Intracranial sinus venous thrombosis; *see* Sinus thrombosis
Intraluminal pressure; *see* Blood pressure
Ischemia
Identification and treatment of myocardial ischemia in patients undergoing peripheral vascular surgery (Andrews et al) 8
Popliteal entrapment syndrome: case report, review, and sonographic diagnosis (Raby et al) 282 (Vascular grand rounds)
Isoprenoids
Vascular smooth muscle and atherosclerosis: role of isoprenoids and calcium antagonists (Corsini et al) 111
Kidney
Effect of antihypertensive drugs on vascular hypertrophy and vascular angiotensin II in two-kidney, one-clip hypertensive rats (Morishita et al) 38
Endothelium-derived nitric oxide is less important for basal tone regulation in the pulmonary than the renal circulation of the adult rat (Hampl et al) 22
Leg
Popliteal entrapment syndrome: case report, review, and sonographic diagnosis (Raby et al) 282 (Vascular grand rounds)
Letter
Correction (Olin and Bacharach) 292
Lipids
The endothelium: influence of blood pressure and lipids (Noll and Lüscher) 95
Lipid-lowering drugs: potential for primary and secondary prevention (Sleight) 125
Lipoproteins
Mechanisms of low-density lipoprotein oxidation: implications for antioxidant therapy (Goldstein and Heinecke) 212 (Trends)
Triglyceride-rich lipoproteins: origins, fates, and possible roles in atherogenesis (Jones) 54 (Trends)
Liver
Adult hepatic cavernous hemangioma (Ma and Cooke) 74 (Vascular grand rounds)
Low-density lipoproteins; *see* Lipoproteins
Lower extremity; *see* Leg
Lung
Endothelium-derived nitric oxide is less important for basal tone regulation in the pulmonary than the renal circulation of the adult rat (Hampl et al) 22
Medical angiology
European fellowship in medical angiology: program proposal (Catalano and European) 5 (Editorial)
Medical students; *see* Students, medical
Muscle, smooth, vascular
Antiproliferative effects of verapamil enantiomers on vascular smooth muscle cells (Simpson et al) 46
Conversion of angiotensin I to angiotensin-(1–7) by thimet oligopeptidase (EC 3.4.24.15) in vascular smooth muscle cells (Chappell et al) 129
Effect of increased intraluminal pressure on human saphenous vein vasomotor function in vitro (Schwartz et al) 31
Vascular smooth muscle and atherosclerosis: role of isoprenoids and calcium antagonists (Corsini et al) 111
Myocardial ischemia; *see* Ischemia
Nitric oxide
Endothelium-derived nitric oxide is less important for basal tone regulation in the pulmonary than the renal circulation of the adult rat (Hampl et al) 22
Northwestern University Medical School
Vascular Center at Northwestern University Medical School (Pearce et al) 286 (Vascular center update)
Nutrition
Nutrient intake and cardiovascular risk factors of first-year medical students (Farris et al) 138

Oral contraceptives; *see* Contraceptives, oral
Orthostatic hypotension; *see* Hypotension, orthostatic
Peptides
  Conversion of angiotensin I to angiotensin-(1–7) by thimet oligopeptidase (EC 3.4.24.15) in vascular smooth muscle cells (Chappell et al) 129
Perindopril
  Efficacy and safety of perindopril and hydrochlorothiazide in stage I–III hypertension (Black et al) 191
Peripheral vascular diseases
  Functional outcomes for patients with intermittent claudication: bypass surgery versus angioplasty versus noninvasive management (Reifler et al) 203
  Identification and treatment of myocardial ischemia in patients undergoing peripheral vascular surgery (Andrews et al) 8
Plaque; *see* Atherosclerosis
Popliteal artery
  Popliteal entrapment syndrome: case report, review, and sonographic diagnosis (Raby et al) 282 (Vascular grand rounds)
Postoperative complications
  Assessing cardiac risk of vascular surgery: the Massachusetts General Hospital experience (Abraham et al) 160 (Trends)
  Identification and treatment of myocardial ischemia in patients undergoing peripheral vascular surgery (Andrews et al) 8
Pseudoaneurysm; *see* Aneurysm
Pulmonary circulation
  Endothelium-derived nitric oxide is less important for basal tone regulation in the pulmonary than the renal circulation of the adult rat (Hampl et al) 22
Raynaud's disease
  Raynaud's phenomenon (Coffman) 259 (Trends)
Receptors, adrenergic, alpha
  Raynaud's phenomenon (Coffman) 259 (Trends)
Renal circulation
  Endothelium-derived nitric oxide is less important for basal tone regulation in the pulmonary than the renal circulation of the adult rat (Hampl et al) 22
Renal hypertension; *see* Hypertension, renal
Renovascular hypertension; *see* Hypertension, renovascular
Revascularization
  Determinants of long-term blood pressure response to renal revascularization (White et al) 16
Risk factors
  Ambulatory blood pressure and cardiovascular risk stratification (Mansoor and White) 61 (Preventive medicine)
  Assessing cardiac risk of vascular surgery: the Massachusetts General Hospital experience (Abraham et al) 160 (Trends)
  Nutrient intake and cardiovascular risk factors of first-year medical students (Farris et al) 138
Saphenous vein
  Effect of increased intraluminal pressure on human saphenous vein vasomotor function in vitro (Schwartz et al) 31
Sinus thrombosis
  Heparin in the treatment of intracranial sinus venous thrombosis (Bossi et al) 199
Society for Vascular Medicine and Biology
  Guidelines for a training program in vascular medicine: a position paper from the Society for Vascular Medicine and Biology (Cooke et al) 1 (Editorial)
Sonography; *see* Ultrasonography
Specialties, medical
  European fellowship in medical angiology: program proposal (Catalano and European) 5 (Editorial)
Stanford Center for Vascular Medicine and Biology
  Report to the National Heart, Lung and Blood Institute from the Stanford Center for Vascular Medicine and Biology (Cooke) 183 (Vascular center update)
Stents
  Infected pseudoaneurysm at the site of an iliac artery Palmaz stent: case report and review (Mossad et al) 277 (Vascular grand rounds)
Stroke; *see* Cerebrovascular disorders
Students, medical
  Nutrient intake and cardiovascular risk factors of first-year medical students (Farris et al) 138
Telangiectasis
  Causes of venous varicosities and telangiectasias: implications for treatment (Bergan) 168 (Trends)
Thimet oligopeptidase
  Conversion of angiotensin I to angiotensin-(1–7) by thimet oligopeptidase (EC 3.4.24.15) in vascular smooth muscle cells (Chappell et al) 129
Thrombosis
  The antithrombotic effects of acetylation of fibrinogen by aspirin (Ezratty et al) 152
  Effort thrombosis (Ma and Cooke) 87 (Images)
  Pathophysiology of plaque rupture (Shah et al) 244 (Trends)
Training programs; *see* Education
Trandolapril
  The Ca^{2+} antagonist verapamil potentiates the effect of the angiotensin-converting enzyme inhibitor trandolapril on cyclic coronary blood flow reductions (Kirchengast et al) 144
Triglycerides
  Triglyceride-rich lipoproteins: origins, fates, and possible roles in atherogenesis (Jones) 54 (Trends)
Ultrasonography
  Popliteal entrapment syndrome: case report, review, and sonographic diagnosis (Raby

et al) 282 (Vascular grand rounds)
The University of Washington
Report to the National Heart, Lung and Blood Institute from The University of Washington (Culver) 187 (Vascular center update)
Upper extremity; *see* Arm
